PRIN 2026: funded projects

Data of 11/10/2026; 18 of 28 sectors

1 Scope

The report covers 18 of the 28 ERC sectors of the PRIN 2026 call, those for which the MUR had published the decree, the ranking (Tabella A) and the funded projects (Tabella B) when the data were extracted: LS2, LS3, LS4, LS7, PE1, PE2, PE3, PE5, PE6, PE7, PE8, PE9, PE10, PE11, SH4, SH5, SH6 and SH7. Not yet published: PE4, LS1, LS5, LS6, LS8, LS9, SH1, SH2, SH3 and SH8. Every figure and number refers to these 18 sectors only.

1.1 Definitions

- **Budget**: the sum, over the 18 sectors, of the funds that the decrees make available to each sector (under-40 pool plus ordinary pool): 164.01 M EUR.
- **Share**: MUR contribution received by an institution, region or other group, divided by the budget, in percent.
- **PI** and **RU**: the coordinating unit of a project and its partner units; the money of a project is the sum of the MUR contributions of its units.
- **Under-40 PI**: a principal investigator printed in green in the MUR tables.

1.2 Data

144 funded projects and 726 funded units (144 PI, 582 RU) from Tabella B, receiving 155.40 M EUR (94.75% of the budget). Tabella A lists 235 ranked projects, 144 of them funded; it contains the projects the evaluation committees judged fundable, not all the projects submitted. Gender is inferred from the first given name with a table of 287 names (60 assigned by hand, 227 by the Italian ending rule); it is a binary inference used only in aggregate. City, region and type of each institution come from a hand-checked table of 84 institutions.

- Professors, researchers and research fellows of the universities by region, 2024: personale_xgenere.csv, dataset 2020–2024 Personale universitario of the open data of the MUR statistical office (USTAT). The staff is all the university staff in post, not those who applied to the programme, for which no data are available.
- Professors and researchers by CUN scientific-disciplinary area, 2024: personale_docentediruoloricercatorexareasd.csv, same dataset; the same file by qualification (PO, PA, RTD, RU) gives `data/staff_by_area_level.csv`.
- Disciplinary group (GSD 2024) and career level of the unit leaders: looked up by name in the staff search of the MUR portal Cerca Università (see `gsd.py`); only aggregates are kept in the repository.

2 Analyses

2.1 Budget and its distribution

2.1.1 Budget and funded money per sector

Purpose. To compare, sector by sector, the money funded with the budget the decrees make available, and to separate the money that went to projects whose PI is under 40.

Result. The budget is 164.01 M EUR and 155.40 M EUR (94.8%) was funded. Per sector, the funded money is between 82.5% of the budget of LS3 and 100.0% of the budget of PE1. 37 of the 144 funded projects have an under-40 PI; they received 40.11 M EUR (25.8% of the funded money). The under-40 pools of the 18 sectors add up to 24.32 M EUR; in 13 sectors the money of the under-40 PIs' projects is larger than the sector's pool. 9 funded under-40 projects rank below the best unfunded project of an over-40 PI (LS4, LS7, PE1, PE5, PE8, SH5 and SH6).

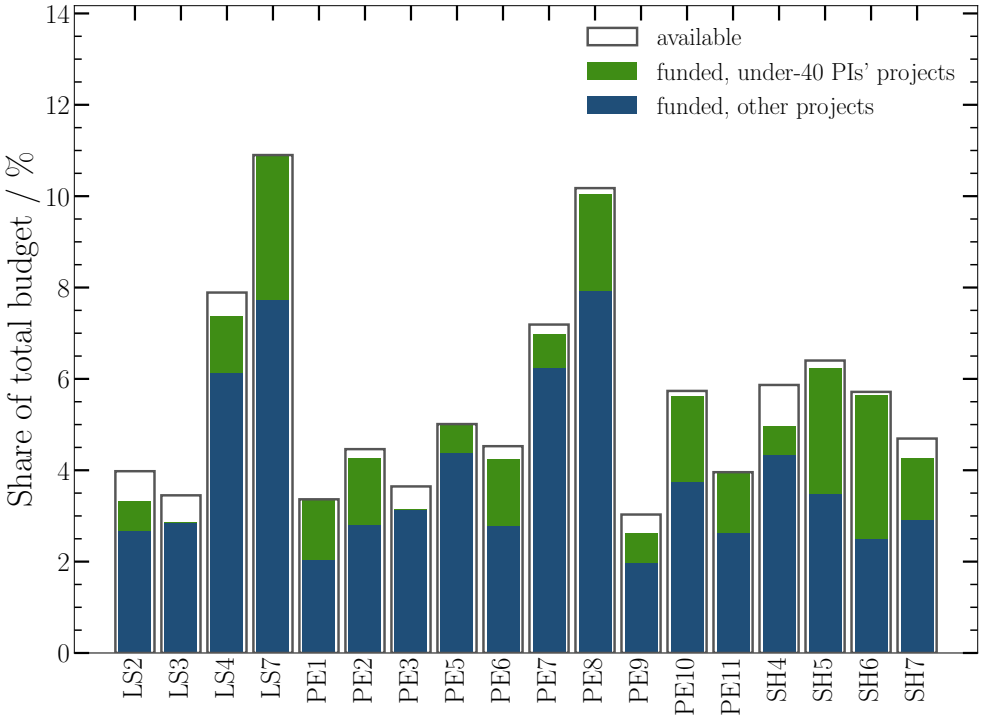

Figure 1: Per sector, in percent of the total budget: budget available (outline) and funded money, split into projects of under-40 PIs (green) and the others (blue). 18 of 28 sectors.

2.1.2 Institution types

Purpose. To show how the budget is divided among types of institution (public and private universities, telematic universities, advanced schools, research bodies).

Result. Public universities received 76.9% of the budget, national research bodies 9.4%, private universities 3.9%, advanced schools 2.7%, telematic universities 1.3%. The table gives the number of institutions and the shares by role.

Type	Institutions	Projects	Share (%)	as PI (%)	as RU (%)
Public univ.	58	144	76.88	20.11	56.77
Private univ.	8	28	3.87	0.73	3.14
Telematic univ.	4	12	1.32	0.00	1.32
Advanced schools	7	15	2.71	1.34	1.37
Research bodies	2	4	0.50	0.00	0.50
National bodies	4	58	9.36	2.07	7.29

Total	84	144	94.75	24.26	70.49

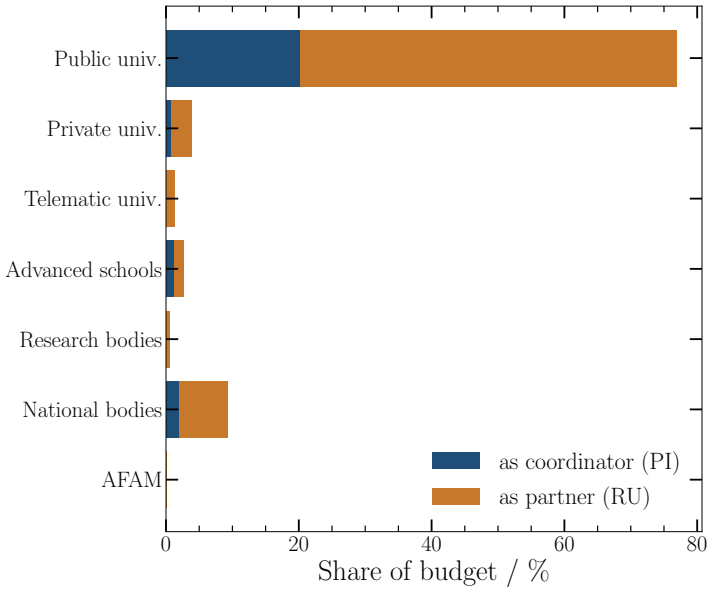

Figure 2: Share of the total budget by institution type, as coordinator (PI) and as partner (RU).

2.1.3 MUR contribution per unit

Purpose. To show the distribution of the money assigned to a single unit, for coordinating and for partner units.

Result. The 144 coordinating units received a median of 258 k EUR (quartiles 222 and 303; range 150 to 618 k EUR). The 582 partner units received a median of 193 k EUR (quartiles 167 and 222; range 56 to 489 k EUR).

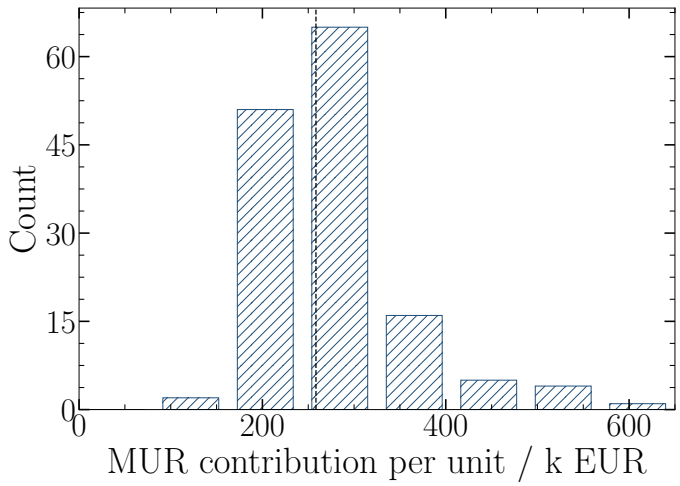

Figure 3: Histogram of the MUR contribution of the coordinating units; the dashed line is the median.

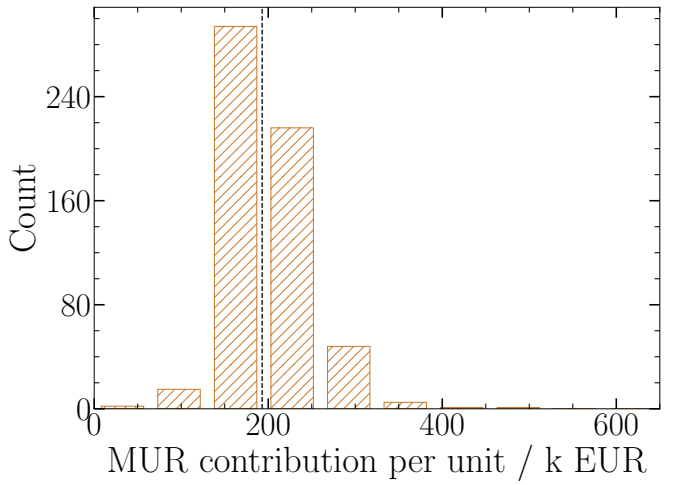

Figure 4: Histogram of the MUR contribution of the partner units; the dashed line is the median.

2.1.4 Units per project

Purpose. To show how many units (the coordinating unit and the partner units, each at a different institution) the funded projects have.

Result. The 144 funded projects have between 4 and 6 units: 44 with 4 units (30.6%), 50 with 5 units (34.7%) and 50 with 6 units (34.7%). The table gives them by ERC macro-area, the share of all the units, and the mean MUR contribution per project and per unit.

Units	Projects	Projects (%)	PE	LS	SH	Units (%)	Per project (k EUR)	Per unit (k EUR)
4	44	30.6	19	14	11	24.2	1063	266
5	50	34.7	27	9	14	34.4	1077	215
6	50	34.7	28	15	7	41.3	1095	183
Total	144	100.0	74	38	32	100.0	1079	214

2.2 Institutions

2.2.1 Funding by institution

Purpose. To show which institutions received the largest shares of the budget and how the budget is divided among institutions.

Result. 84 institutions have at least one funded unit. The largest share is that of CNR (7.2%), followed by Sapienza (6.2%) and Padova (4.6%). The 10 best-funded institutions received 41.0% of the budget and the 20 best-funded 61.0%; after accounting for them, 59.0% and 39.0% of the budget are left.

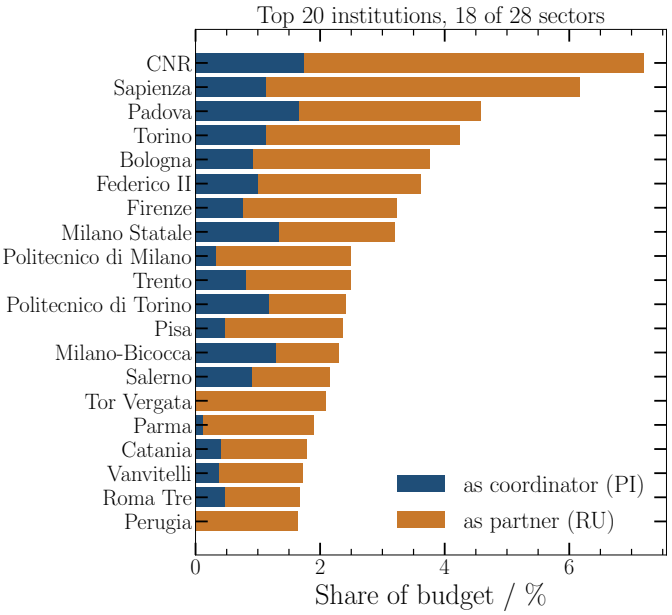

Figure 5: Share of the total budget of the 20 best-funded institutions, as coordinator (PI) and as partner (RU).

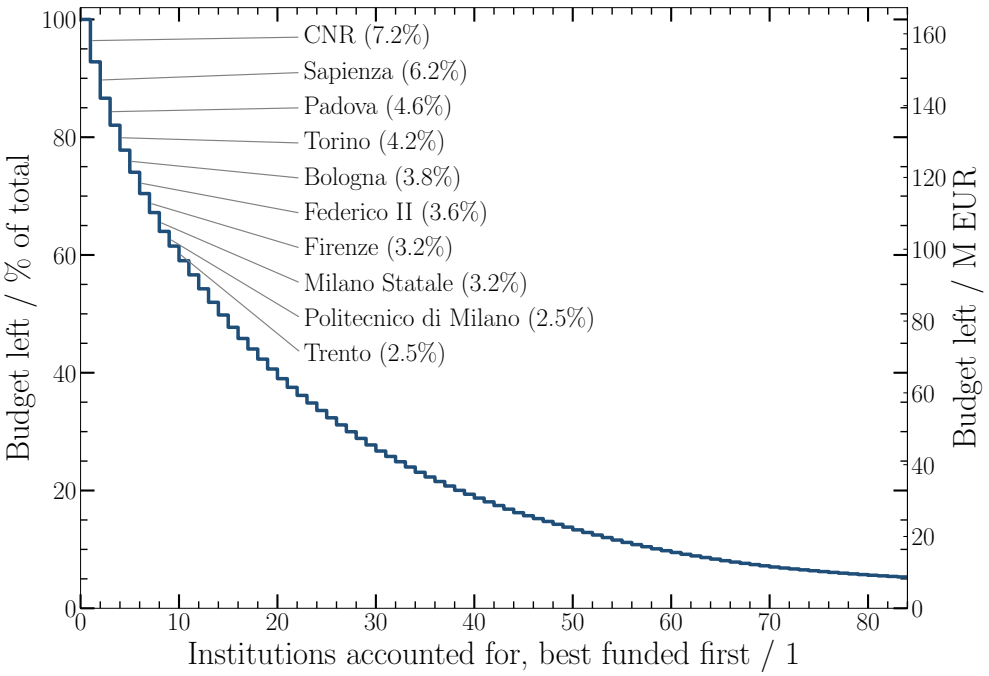

Figure 6: Budget left, in percent of the total, as the institutions are accounted for from the best funded to the least funded; the ten largest steps are named.

2.2.2 Breadth across sectors

Purpose. To show in how many sectors each institution has funded units, against the share of the budget it received.

Result. The number of sectors with at least one funded unit has median 3 across the 84 institutions; 19 institutions have funded units in one sector only. The maximum, 16 sectors, is reached by Padova. The Spearman correlation between the number of sectors and the money received is 0.94 (p = 4e-39).

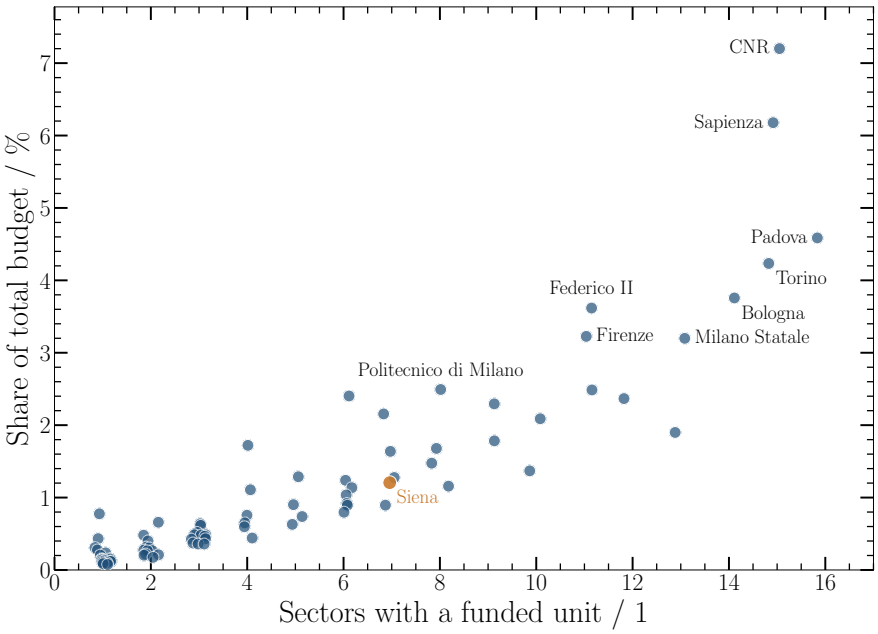

Figure 7: Share of the total budget of each institution against the number of sectors with a funded unit (horizontal jitter added).

2.3 Geography

2.3.1 Money by region and city

Purpose. To show where the money went: by region, by city, and, per region and macro-area, which part of the funding came from units coordinating projects and which from partner units.

Result. The regions with the largest shares are Lombardia (14.4%), Lazio (12.9%) and Campania (8.9%). National research bodies (CNR, INAF, INFN, INGV), which have no region, received 9.4%. No funded unit is in Valle d'Aosta. The 53 cities with a funded unit include Roma (11.8%), Milano (10.3%), Torino (6.9%), Napoli (4.9%) and Padova (4.6%) as the five largest. The share of the money received by units coordinating projects is, by macro-area: North 30%; Centre 21%; South and Islands 24%. Liguria, Molise, Basilicata and Calabria have no coordinating unit among their funded units. The table of regions is in Appendix C.

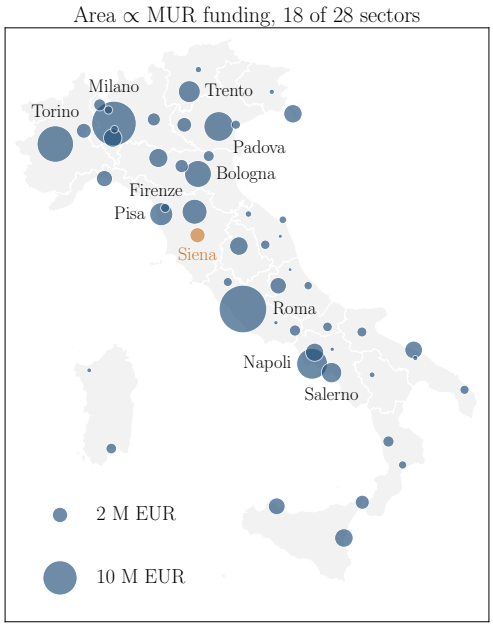

Figure 9: MUR funding by city (circle area proportional to the money).

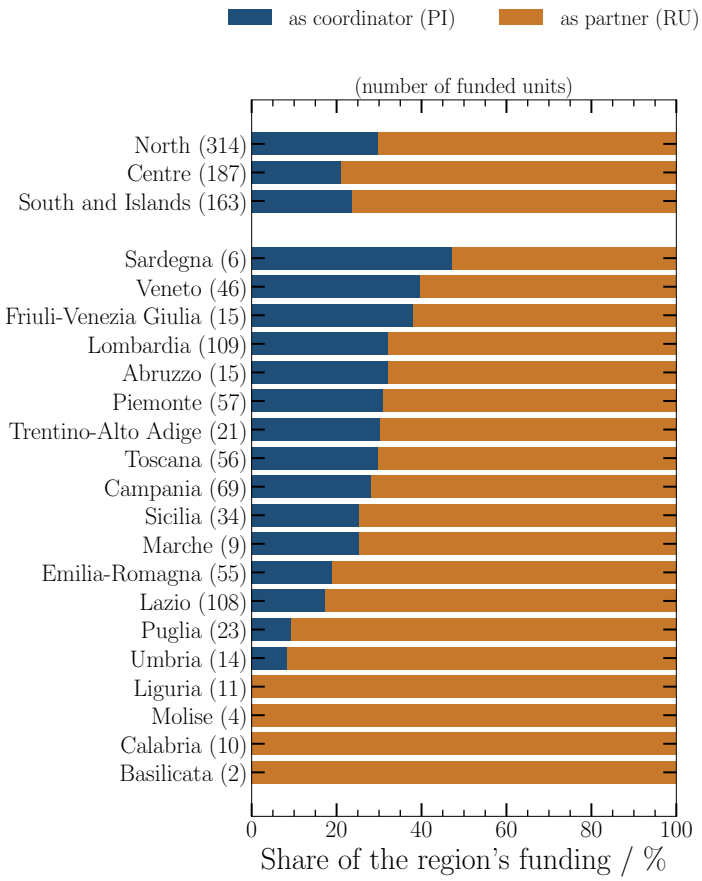

Figure 10: Share of each macro-area's and region's funding received as coordinating (PI) and as partner (RU) units; in brackets, the number of funded units.

2.3.2 Collaboration between cities

Purpose. To show which cities share funded projects, counting the national research bodies as one node.

Result. 511 pairs of nodes share at least one funded project and 28 share eight or more. The pairs sharing the most projects are national bodies–Roma (28), Milano–Roma (27), national bodies–Torino (25), Milano–national bodies (24) and Milano–Torino (23).

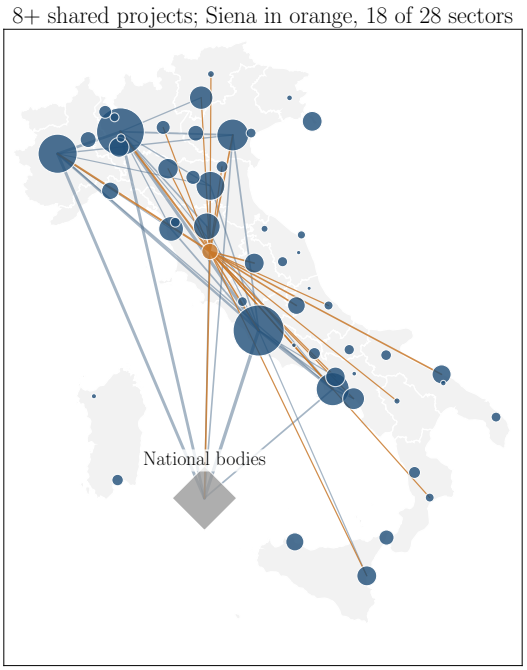

Figure 11: Pairs of cities sharing at least 8 funded projects (line width proportional to the number); circle area proportional to the money; the diamond is the national research bodies. 18 of 28 sectors.

2.3.3 Budget, population and university staff by region

Purpose. To compare the share of the total budget gathered by each region, as in the regional map, with its share of the resident population and of the professors and researchers of its universities.

Result. Across the 19 regions with funded units, the share of the budget has Pearson correlation 0.91 and Spearman correlation 0.83 with the share of the resident population, and 0.96 and 0.88 with the share of professors and researchers (the national research bodies are not regions and are left out of the correlations; Valle d'Aosta has no funded unit and is left out). The national research bodies (CNR, INAF, INFN and INGV) belong to no region and received 9.4% of the budget; a further 5.2% of the budget was not assigned. The table gives the shares and, in the last two columns, the share of the budget divided by the share of the population and of the staff. The staff shares refer to all the professors and researchers of the Italian universities, not to those who applied to the programme, for which no data are available.

2.4 People

2.4.1 Gender of the unit leaders

Purpose. To show the share of women among the leaders of the funded units, with the uncertainty due to the small numbers, by macro-area (PE, LS, SH).

Result. Among the 144 funded PIs, 33% are women (95% interval 26–41); among the 582 leaders of funded partner units, 37% (33–41). The first given name was found in the name table for all 726 leaders considered. The table gives the shares by macro-area.

2.4.2 Disciplinary group of the unit leaders

Purpose. To show the disciplinary group (GSD 2024) of the leaders of the funded units, by area of the National University Council (CUN), against the professors and researchers of the Italian universities.

Result. The GSD was found at the university of the unit for 655 of the 726 leaders (134 PI, 521 partner-unit leaders). The other leaders are: found only at another university 3, in no record 65 (research bodies and other institutions that are not universities, and people not listed), several records at the university 3, not looked up 0. The three areas with most leaders are 06 Scienze mediche (113), 09 Ingegneria industriale e dell'informazione (103) and 05 Scienze biologiche (77). The units whose leader's GSD was found received 84.3% of the budget; by CUN area, the share of the budget has Pearson correlation 0.70 and Spearman correlation 0.57 with the share of the professors and researchers. The first table gives the leaders by CUN area (the first two digits of the GSD) and by ERC macro-area, the share of leaders, of staff and of the budget, and the leaders per 1000 professors and researchers; the second the most frequent GSDs. The staff shares refer to all the professors and researchers of the Italian universities, not to those who applied to the programme, for which no data are available.

2.4.3 Career level of the unit leaders

Purpose. To show the career level (full professor PO, associate professor PA, fixed-term researcher RTD) of the leaders of the funded units, the MUR money of their units, and, by CUN area, the share of each level among the leaders, and of the MUR money of their units, against its share among all the professors and researchers of the Italian universities (2024). The levels are from the same MUR directory lookup as the disciplinary group; PRIN sectors have no staff data, so the staff comparison is by CUN area.

Result. The level was found for 655 leaders. Full professors are 84 of the 134 PIs and 213 of the 521 partner-unit leaders; associate professors are 36 and 233; fixed-term researchers are 14 and 73. The units led by full professors received 39.5% of the total budget, those led by associate professors 33.4%, those led by fixed-term researchers 11.1%. The mean MUR contribution per unit is in the last column. Over all areas, PO are 27.4% of the staff and 45.3% of the leaders, PA 43.1% and 41.1%, RTD 22.9% and 13.3%; the leaders per 1000 staff are 16.8 for PO, 9.7 for PA and 5.9 for RTD. Of the MUR money of the units whose leader's level was found, PO received 46.9%, PA 39.6% and RTD 13.2%. The tables give the same by CUN area.

2.4.4 GSDs within a project

Purpose. To show how many different disciplinary groups (GSD 2024) are among the leaders of the units of a project, and the same for the CUN areas, against the same count when the leaders are assigned to projects at random within the sector, keeping the number of units of each project.

Result. The GSD of every leader was found for 80 of the 144 projects. In these, the mean number of distinct GSDs is 2.27 (0.46 per unit) against 3.45 for the random assignment; 22 projects (27.5%) have a single GSD, against 2.4% for the random assignment. For the CUN areas, the mean is 1.62 against 2.04, and 41 projects (51.2%) have a single area against 25.1%. The random assignment is the mean over 2000 draws within each sector, among the leaders of the projects counted here.

2.5 Institution fact sheet: Siena

Purpose. To collect the figures of one institution and compare them with the other institutions of the same type.

Result. Siena received 1.98 M EUR (1.21% of the budget) in 8 projects, 5 as coordinator and 3 as partner, in 7 sectors; it ranks 26 of 84 institutions and 24 of 58 within its type.
