PRIN 2026: funded projects

Data of 13/11/2026; 28 of 28 sectors

1 Scope

The report covers 28 of the 28 ERC sectors of the PRIN 2026 call, those for which the MUR had published the decree, the ranking (Tabella A) and the funded projects (Tabella B) when the data were extracted: LS1, LS2, LS3, LS4, LS5, LS6, LS7, LS8, LS9, PE1, PE2, PE3, PE4, PE5, PE6, PE7, PE8, PE9, PE10, PE11, SH1, SH2, SH3, SH4, SH5, SH6, SH7 and SH8. Not yet published: . Every figure and number refers to these 28 sectors only.

1.1 Definitions

- **Budget**: the sum, over the 28 sectors, of the funds that the decrees make available to each sector (under-40 pool plus ordinary pool): 259.89 M EUR.
- **Share**: MUR contribution received by an institution, region or other group, divided by the budget, in percent.
- **PI** and **RU**: the coordinating unit of a project and its partner units; the money of a project is the sum of the MUR contributions of its units.
- **Under-40 PI**: a principal investigator printed in green in the MUR tables.

1.2 Data

225 funded projects and 1123 funded units (225 PI, 898 RU) from Tabella B, receiving 244.88 M EUR (94.22% of the budget). Tabella A lists 339 ranked projects, 225 of them funded; it contains the projects the evaluation committees judged fundable, not all the projects submitted. Gender is inferred from the first given name with a table of 353 names (83 assigned by hand, 270 by the Italian ending rule); it is a binary inference used only in aggregate. City, region and type of each institution come from a hand-checked table of 97 institutions.

2 Analyses

2.1 Budget and its distribution

2.1.1 Budget and funded money per sector

Purpose. To compare, sector by sector, the money funded with the budget the decrees make available, and to separate the money that went to projects whose PI is under 40.

Result. The budget is 259.89 M EUR and 244.88 M EUR (94.2%) was funded. Per sector, the funded money is between 76.3% of the budget of LS6 and 100.0% of the budget of PE1. The unfunded part of the budget is 15.01 M EUR; in 24 sectors it is smaller than 1.0 M EUR, the smallest contribution received by a funded project, and in LS6 and SH2 all the ranked projects are funded. 59 of the 225 funded projects have an under-40 PI; they received 65.30 M EUR (26.7% of the funded money). The under-40 pools of the 28 sectors add up to 38.98 M EUR; in 19 sectors the money of the under-40 PIs' projects is larger than the sector's pool. 12 funded under-40 projects rank below the best unfunded project of an over-40 PI (LS4, LS5, LS7, LS8, LS9, PE1, PE5, PE8, SH5 and SH6).

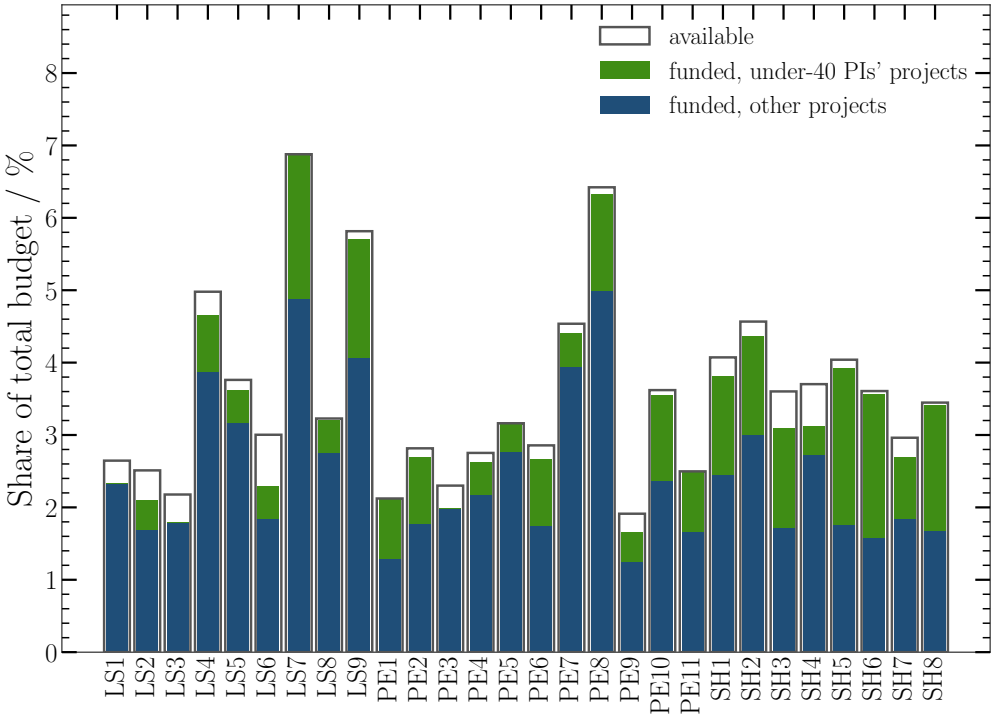

Figure 1: Per sector, in percent of the total budget: budget available (outline) and funded money, split into projects of under-40 PIs (green) and the others (blue). 28 of 28 sectors.

2.1.2 Institution types

Purpose. To show how the budget is divided among types of institution (public and private universities, telematic universities, advanced schools, research bodies).

Result. Public universities received 77.3% of the budget, national research bodies 8.5%, private universities 4.8%, advanced schools 2.1%, telematic universities 1.0%. The table gives the number of institutions and the shares by role.

Type	Institutions	Projects	Share (%)	as PI (%)	as RU (%)

2.1.3 MUR contribution per unit

Purpose. To show the distribution of the money assigned to a single unit, for coordinating and for partner units.

Result. The 225 coordinating units received a median of 260 k EUR (quartiles 226 and 318; range 150 to 618 k EUR). The 898 partner units received a median of 195 k EUR (quartiles 172 and 229; range 56 to 510 k EUR).

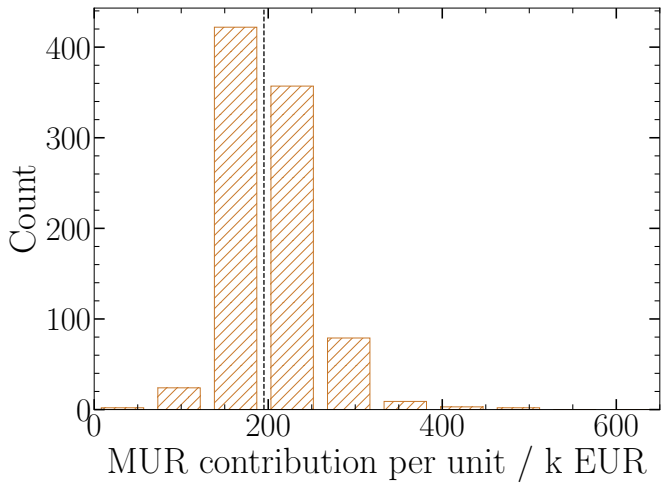

Figure 4: Histogram of the MUR contribution of the partner units; the dashed line is the median.

2.1.4 Units per project

Purpose. To show how many units (the coordinating unit and the partner units, each at a different institution) the funded projects have.

Result. The 225 funded projects have between 4 and 6 units: 74 with 4 units (32.9%), 79 with 5 units (35.1%) and 72 with 6 units (32.0%). The table gives them by ERC macro-area, the share of all the units, and the mean MUR contribution per project and per unit.

2.2 Institutions

2.2.1 Funding by institution

Purpose. To show which institutions received the largest shares of the budget and how the budget is divided among institutions.

Result. 97 institutions have at least one funded unit. The largest share is that of CNR (7.2%), followed by Sapienza (5.8%) and Padova (4.4%). The 10 best-funded institutions received 42.1% of the budget and the 20 best-funded 60.5%; after accounting for them, 57.9% and 39.5% of the budget are left.

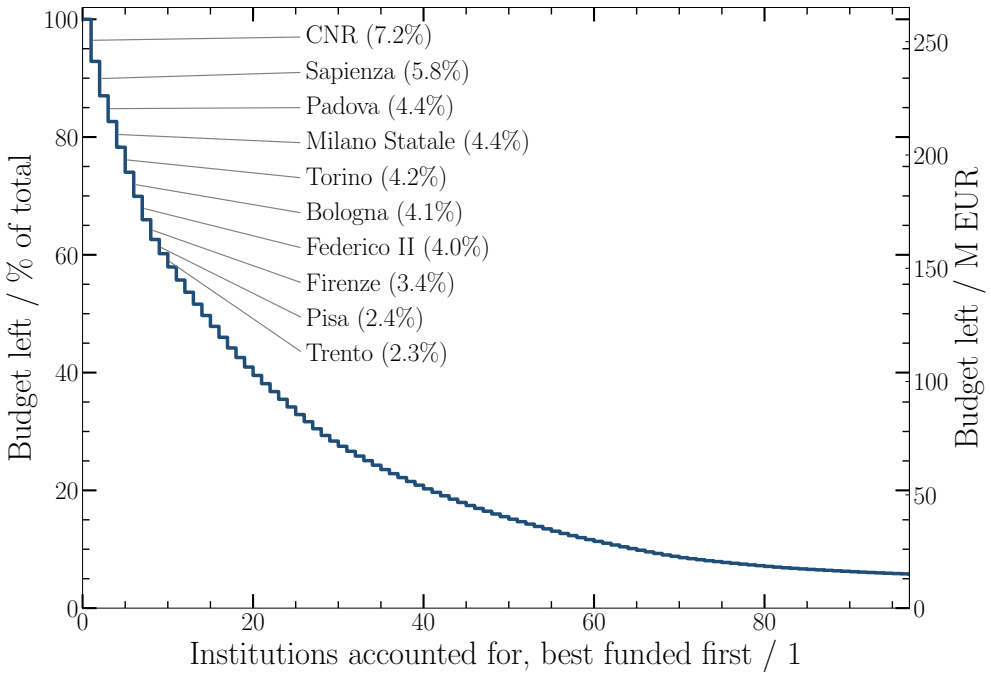

Figure 6: Budget left, in percent of the total, as the institutions are accounted for from the best funded to the least funded; the ten largest steps are named.

2.2.2 Breadth across sectors

Purpose. To show in how many sectors each institution has funded units, against the share of the budget it received.

Result. The number of sectors with at least one funded unit has median 4 across the 97 institutions;

21 institutions have funded units in one sector only. The maximum, 25 sectors, is reached by Sapienza. The Spearman correlation between the number of sectors and the money received is 0.95 ($p = 3e\text{-}50$).

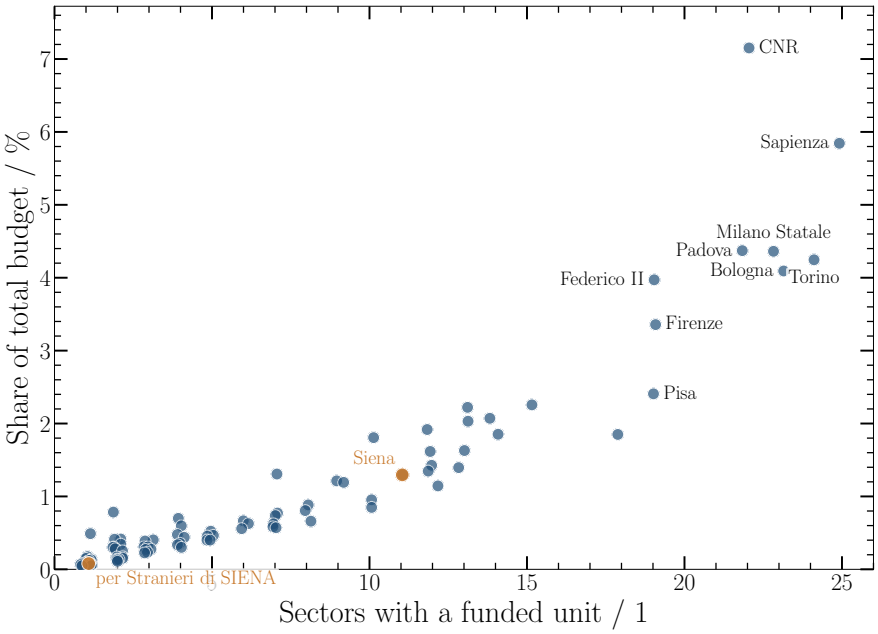

Figure 7: Share of the total budget of each institution against the number of sectors with a funded unit (horizontal jitter added).

2.3 Geography

2.3.1 Money by region and city

Purpose. To show where the money went: by region, by city, and, per region and macro-area, which part of the funding came from units coordinating projects and which from partner units.

Result. The regions with the largest shares are Lombardia (15.7%), Lazio (13.1%) and Campania (8.6%). National research bodies (CNR, INAF, INFN, INGV), which have no region, received 8.5%. No funded unit is in Valle d'Aosta. The 54 cities with a funded unit include Roma (11.8%), Milano (11.5%), Torino (6.2%), Napoli (5.2%) and Padova (4.4%) as the five largest. The share of the money received by units coordinating projects is, by macro-area: North 31%; Centre 21%; South and Islands 24%. Basilicata and Calabria have no coordinating unit among their funded units. The table of regions is in Appendix C.

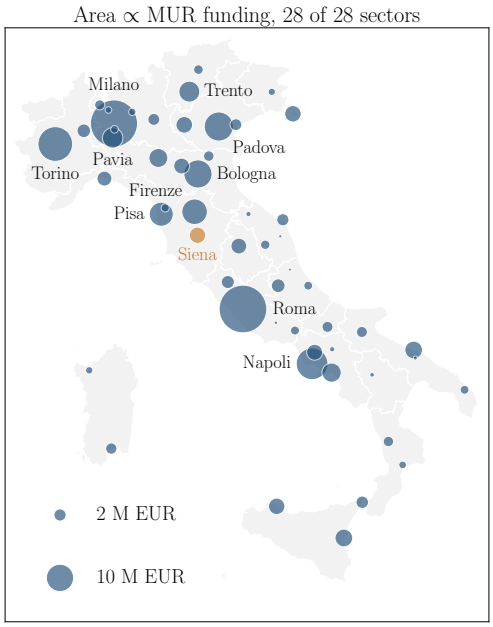

Figure 9: MUR funding by city (circle area proportional to the money).

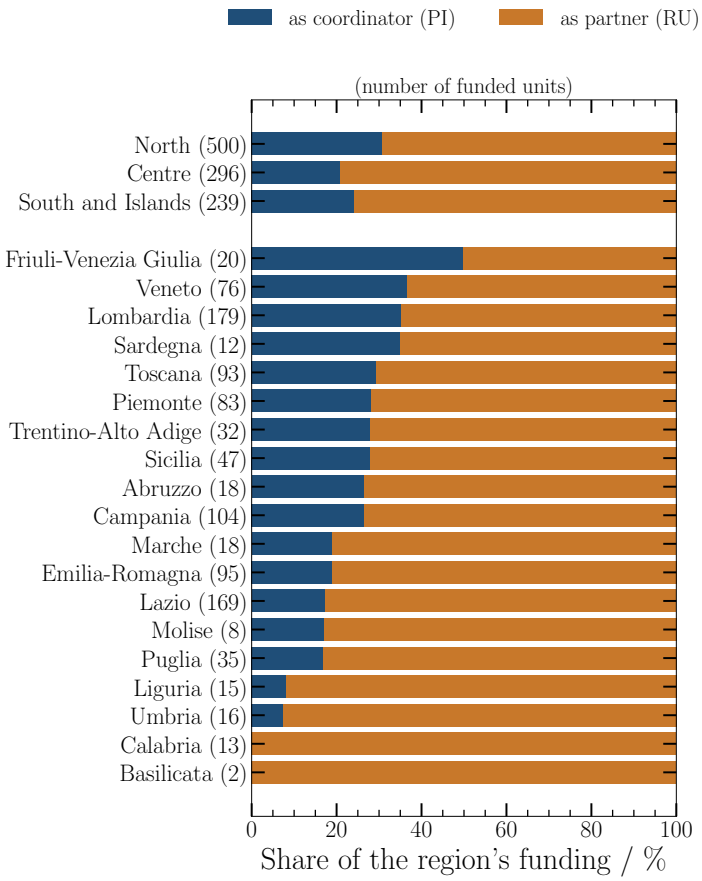

Figure 10: Share of each macro-area's and region's funding received as coordinating (PI) and as partner (RU) units; in brackets, the number of funded units.

2.3.2 Collaboration between cities

Purpose. To show which cities share funded projects, counting the national research bodies as one node.

Result. 631 pairs of nodes share at least one funded project and 48 share eight or more. The pairs sharing the most projects are Milano–Roma (43), Milano–national bodies (35), national bodies–Roma (35), national bodies–Torino (33) and Milano–Torino (32).

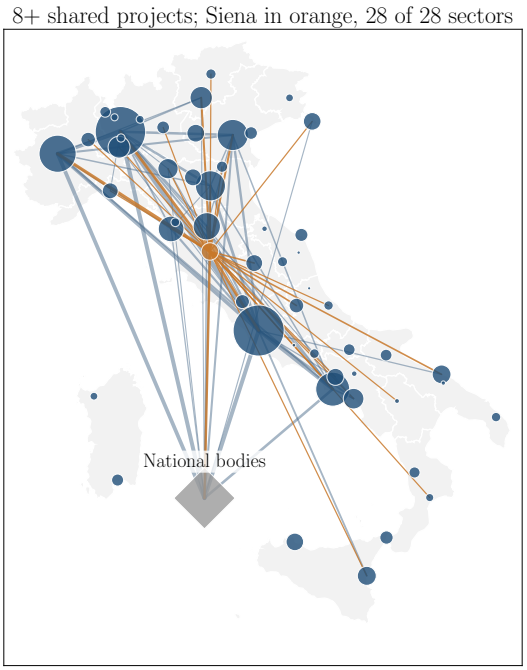

Figure 11: Pairs of cities sharing at least 8 funded projects (line width proportional to the number); circle area proportional to the money; the diamond is the national research bodies. 28 of 28 sectors.

2.3.3 Budget, population and university staff by region

Purpose. To compare the share of the total budget gathered by each region, as in the regional map, with its share of the resident population and of the professors and researchers of its universities.

Result. Across the 19 regions with funded units, the share of the budget has Pearson correlation 0.92 and Spearman correlation 0.81 with the share of the resident population, and 0.97 and 0.90 with the share of professors and researchers (the national research bodies are not regions and are left out of the correlations; Valle d'Aosta has no funded unit and is left out). The national research bodies (CNR, INAF, INFN and INGV) belong to no region and received 8.5% of the budget; a further 5.8% of the budget was not assigned. The table gives the shares and, in the last two columns, the share of the budget divided by the share of the population and of the staff. The staff shares refer to all the professors and researchers of the Italian universities, not to those who applied to the programme, for which no data are available.

2.4 People

2.4.1 Gender of the unit leaders

Purpose. To show the share of women among the leaders of the funded units, with the uncertainty due to the small numbers, by macro-area (PE, LS, SH).

Result. Among the 225 funded PIs, 34% are women (95% interval 28–41); among the 898 leaders of funded partner units, 39% (35–42). The first given name was found in the name table for all 1123 leaders considered. The table gives the shares by macro-area.

2.4.2 Disciplinary group of the unit leaders

Purpose. To show the disciplinary group (GSD 2024) of the leaders of the funded units, by area of the National University Council (CUN), against the professors and researchers of the Italian universities.

Result. The GSD was found at the university of the unit for 1019 of the 1123 leaders (208 PI, 811 partner-unit leaders). The other leaders are: found only at another university 7, in no record 94 (research bodies and other institutions that are not universities, and people not listed), several records at the university 3, not looked up 0. The three areas with most leaders are 05 Scienze biologiche (162), 06 Scienze mediche (150) and 09 Ingegneria industriale e dell'informazione (112). The units whose leader's GSD was found received 84.4% of the budget; by CUN area, the share of the budget has Pearson correlation 0.74 and Spearman correlation 0.77 with the share of the professors and researchers. The first table gives the leaders by CUN area (the first two digits of the GSD) and by ERC macro-area, the share of leaders, of staff and of the budget, and the leaders per 1000 professors and researchers; the second the most frequent GSDs. The staff shares refer to all the professors and researchers of the Italian universities, not to those who applied to the programme, for which no data are available.

2.4.3 Career level of the unit leaders

Purpose. To show the career level (full professor PO, associate professor PA, fixed-term researcher RTD) of the leaders of the funded units, the MUR money of their units, and, by CUN area, the share of each level among the leaders, and of the MUR money of their units, against its share among all the professors and researchers of the Italian universities (2025). The levels are from the same MUR directory lookup as the disciplinary group; PRIN sectors have no staff data, so the staff comparison is by CUN area.

Result. The level was found for 1019 leaders. Full professors are 123 of the 208 PIs and 327 of the 811 partner-unit leaders; associate professors are 57 and 378; fixed-term researchers are 28 and 102. The units led by full professors received 38.2% of the total budget, those led by associate professors 35.0%, those led by fixed-term researchers 10.9%. The mean MUR contribution per unit is in the last column. Over all areas, PO are 27.7% of the staff and 44.2% of the leaders, PA 46.3% and 42.7%, RTD 20.4% and 12.8%; the leaders per 1000 staff are 24.9 for PO, 14.4 for PA and 9.8 for RTD. Of the MUR money of the units whose leader's level was found, PO received 45.3%, PA 41.5% and RTD 12.9%. The tables give the same by CUN area.

2.4.4 GSDs within a project

Purpose. To show how many different disciplinary groups (GSD 2024) are among the leaders of the units of a project, and the same for the CUN areas, against the same count when the leaders are assigned to projects at random within the sector, keeping the number of units of each project.

Result. The GSD of every leader was found for 129 of the 225 projects. In these, the mean number of distinct GSDs is 2.36 (0.48 per unit) against 3.50 for the random assignment; 34 projects (26.4%) have a single GSD, against 2.4% for the random assignment. For the CUN areas, the mean is 1.62 against 2.08, and 66 projects (51.2%) have a single area against 25.3%. The random assignment is the mean over 2000 draws within each sector, among the leaders of the projects counted here.
